TashPMI, Foreign languages department

Introduction: In today's world, where the borders of different countries are becoming easier to overcome, especially for professionals in the medical field, importance of English is significantly increasing.

Globalization and accelerated exchange of information require knowledge of the language of international communication and, in particular, its special features and the use of terminology in the medical professions. Consequently, it becomes urgently necessary to acquire reading skills and a good understanding of the medical literature in the English language for progressing to the level required for communication with colleagues from the USA, the UK, Australia, Israel and other countries known for their significant achievements in the development of medicine. Why should a doctor know English? First of all, it may seem that the doctor's knowledge of English is not the key aspect in professional growth. In fact, if you aim at the constant improvement of skills and want to work in a prestigious clinic, and even more so, to cooperate with your foreign colleagues, you must know English. Let's see how the knowledge of English helps a doctor.

Main part. The doctor who speaks English is better aware of current trends in medicine. Knowing English, you can freely read foreign medical journals, most of the modern books on medicine; get acquainted with publications in the English language on medical websites. And, of course, in terms of volume and relevance, such information compares favorably with the information available in Russian or Uzbek. Knowledge of the English allows improving skills continuously and making advanced diagnostic and treatment methods. But why English? Because of the fact that scientific publications, primarily, are available for a wide range of readers just in English, and it can take a lot of time before they will be translated into Russian or Uzbek. In the research world, English became often the language of communication.

Conclusion English must be your first assistant in your work and study especially if you have IELTS. It may open almost many doors to everywhere when you want to find interesting work, where you can show your know professional skills and will allow you to work in a team with foreign specialists. Many domestic clinics cooperate with foreign medical institutions, invite foreign experts to work or carry out consultations in difficult cases, to make a diagnosis jointly or to determine the methods of treatment patients. In addition, doctors speaking English may be invited to participate in international clinical trials.
