*SamSIFL, a senior teacher of the
Department of English history and grammar*

Abstract: today, innovative approaches are needed to make the educational process more interactive and effective. The article analyzes methods of teaching English through modern pedagogical technologies, including multimedia tools, online platforms and mobile applications. Modern technologies help to increase students' ability to self-study, expand opportunities for practical use of the language, and facilitate the educational process for teachers.

Key words: modern pedagogical technologies, innovative approaches, multimedia tools, online platforms, interactive education, mobile applications, methods, language skills.

Annotatsiya: hozirgi kunda ta'lim jarayoni yanada interaktiv va samarali bo'lishi uchun innovatsion yondashuvlar zarur. Maqolada zamonaviy pedagogik texnologiyalar, jumladan, multimedia vositalari, onlayn platformalar va mobil ilovalar orqali ingliz tilini o'qitish usullari tahlil qilinadi. Zamonaviy texnologiyalar talabalarning o'z-o'zini o'rganish qobiliyatini oshirish, tilni amaliy qo'llash imkoniyatlarini kengaytirish va o'qituvchilar uchun ta'lim jarayonini yengillashtirishga yordam beradi.

Kalit so'zlar: zamonaviy pedagogik texnologiyalar, innovatsion yondashuvlar, multimedia vositalari, onlayn platformalar, interaktiv ta'lim, mobil ilovalar, metodikalar, til ko'nikmalari.

Nowadays, the importance of learning English in Uzbekistan is much higher than before. A number of English language experts are implementing new methods and ways of learning English. This will definitely increase the effectiveness of teaching foreign languages. Teaching using technology has several unique advantages. In addition, it greatly increases the efficiency of the teaching system and, in turn, helps the language learner to keep up with the times and move forward. Technology is slowly replacing traditional teaching. Today, a number of new programs and shows that help to teach English are regularly broadcast on television programs. It should also be noted that today new methods of using modern innovative technologies have been introduced in Uzbekistan to increase the effectiveness of teaching. For example, a student who is being taught a foreign language on the basis of multimedia has the opportunity to develop four skills and learn both by seeing and hearing through interesting materials. In addition, the student can guess the meaning of some words by watching live actions and tries to understand it. Of course, the use of modern technologies such as computers, radios, CDs, and DVDs in any foreign language classes will advance the educational process and allow the young generation to learn foreign languages faster. Nowadays, the importance of learning English in Uzbekistan is much higher than before. A number of English language experts are implementing new methods and ways of learning English. This will definitely increase the effectiveness of teaching foreign languages. There are several unique advantages of teaching using technologies. In addition, it greatly increases the efficiency of the teaching system and, in turn, helps the language learner to keep up with the times and move forward. Technology is slowly replacing traditional teaching. . Today, a number of new programs and shows that help to teach English are regularly broadcast on television programs. It should also be noted that today new methods of using modern innovative technologies have been introduced in Uzbekistan to increase the effectiveness of teaching. For example, a student who is being taught a foreign language on the basis of multimedia has the opportunity to develop four skills and learn both by seeing and hearing through interesting materials. In addition, the student can guess the meaning

of some words by watching live actions and tries to understand it. Of course, modern technologies such as computer, radio. The use of CDs and DVDs further advances the educational process and allows the young generation to learn foreign languages faster. makes them a little bored. It is for this reason, that is, in order not to extinguish the enthusiasm of the learner, the use of technologies and at least the computer during the lesson ensures that the learner's interest increases. After all, educational materials prepared according to the learner's age, interest, ability, mastery of the lessons will definitely be effective. On the contrary, if we teachers do not choose educational materials based on these requirements, if we broadcast videos, songs or texts containing complex words to elementary school students, or show them through multimedia, computers, When we present teaching materials with very simple texts to middle and high school students or group learners, the students' interest in learning the language gradually fades and the lessons begin to fade. they don't master it. This, in turn, can lead to a decrease in grades and a loss of respect for the teacher in front of the students. So, it follows that the main task is not only to use technologies during the lesson, but also to be able to use them in their place and to ensure that the use of technologies serves to increase the student's knowledge. After our country gained independence, interest in teaching foreign languages increased and many opportunities were created for young people. As our first president Islam Karimov said, "Currently, teaching foreign languages is given great importance in our country. This is certainly not for nothing. Today, there is no need to overestimate the importance of perfect knowledge of foreign languages for our countries, which are striving to take their rightful place in the world community, and for our people, who are building their great future in solidarity and cooperation with our foreign partners. As a logical continuation of these thoughts, the Presidential Decree "On measures to further improve the system of teaching foreign languages" adopted on December 10, 2012 expanded the opportunities for learning foreign languages. In our republic, new methods and requirements have been developed in accordance with the recommendations of the European framework for foreign language teaching and assessment of knowledge and skills of foreign language teachers (CEFR). According to it, textbooks were created for students of general education schools and vocational colleges. In accordance with these requirements, classrooms were equipped with stands and new information and communication techniques. The demand for learning a foreign language is increasing day by day. Foreign language science is divided into four aspects (reading, speaking, listening and speaking), and separate concepts and skills are given for each of them. Educational technologies are effective use of modern information technologies in the educational process. It also provides for increasing the quality and efficiency of education by introducing modern innovative technologies into the educational process. In particular, there are several advantages of using such information and communication technologies in learning a foreign language. The role of modern technology in language learning and teaching is incomparable. The use of technological tools is useful in every aspect of learning a foreign language (reading, reading, listening and speaking). For example, to listen and understand, of course, this process cannot be carried out without a computer, player, CD discs. Listening comprehension is one of the most important parts of language learning. At the same time, the reader is required to pay attention to the speaker's pronunciation, adherence to grammatical rules, vocabulary and its meanings. An important factor in the use of modern technologies in the educational process is that students know information and communication technologies well and are able to use them. Teaching and learning a foreign language using modern technologies is one of the most fruitful ways. In this process, including: - using computers, the student can watch and listen to foreign language videos, demonstrations, dialogues, movies or cartoons; - it is possible to listen and watch foreign language radio broadcasts and television programs; - use of tape recorders and cassettes, which are considered a more traditional method; - CD players can be used. The use of these technical tools makes the process of learning a foreign language more interesting and effective for students. Today, teaching through interactive games is becoming a tradition in schools. It is known that the lesson is conducted on the basis of various games, which ensures that students demonstrate

their capabilities, concentrate, improve their knowledge and skills, and become stronger. The basis of the use of game technology is the activity that activates and accelerates the student. The basis of the use of game technology is the activity that activates and accelerates the student.

Communicative method is aimed at students to use English language in real life communication. Their main goal in language learning is participation in communication and solving practical tasks. Collaborative method - students solve problems together, share information and learn from each other. In this method, groups are created, students are encouraged to cooperate. Games and gamification method is the application of game elements to make learning English interesting and motivating. This method helps students learn new words and grammar through games. Also, students participate in game lessons with interest, strive to win, and the teacher provides education to the student through them. The student believes that he can speak, listen, understand, and write while playing English games, and is interested. For example: Online games, virtual games, language learning programs, quizzes, tests. Quiz cards are distributed according to the number of students and allow all students to participate in the lesson at the same time, which saves time. "Warm-up exercises" is a method of using various games in the classroom to get students interested in the lesson. Language imitation (Imitative Learning) Learning the language by having students listen to English language materials (audio and video) and then reproduce speech and texts based on them. Through this method, children's ability to speak fluently and understand well grows. Auditory exercises are improved through interactive listening tasks, simulating real-life dialogues. English with the help of technology mobile applications and online platforms. have their own ways of learning. The use of modern pedagogical technologies in teaching English not only makes the educational process more effective, but also encourages students to actively participate. Through multimedia tools, online platforms, mobile applications and interactive learning methods, students can learn English in an easy and interesting way. Thus, modern pedagogical technologies play an important role in the educational process and serve to further develop English language teaching in the future.
